SUMMARY

Passionate full stack web developer leveraging sales background to build genuine and memorable user experiences on the web. Pursuing a certificate in full stack development from the University of Utah, with newly developed skills in JavaScript, CSS, Node.js, RESTful APIs and responsive web design. Excelling as top of the class without a single missed mark. Known as a knowledge-resource and innovative team programmer eager to develop apps, with a focus on mobile-first design and development. Worked on a team of four to develop a single-page fitness app that allows health-seekers to find quick access to workout routines and dietary plans. Excited to utilize my skills as part of a fast paced, quality-driven team to build better experiences on the web.
